

Comprehensive Evaluation

Name:Guilherme Lemos

ID:P002

Birth Date:(dd/MM/yyyy)

Ht:

Wt:87.0

Gender:Male

Session:14/09/2026 20:39:37

Involved:Both

Clinician:

Referral:

Joint:Wrist

Diagnosis:

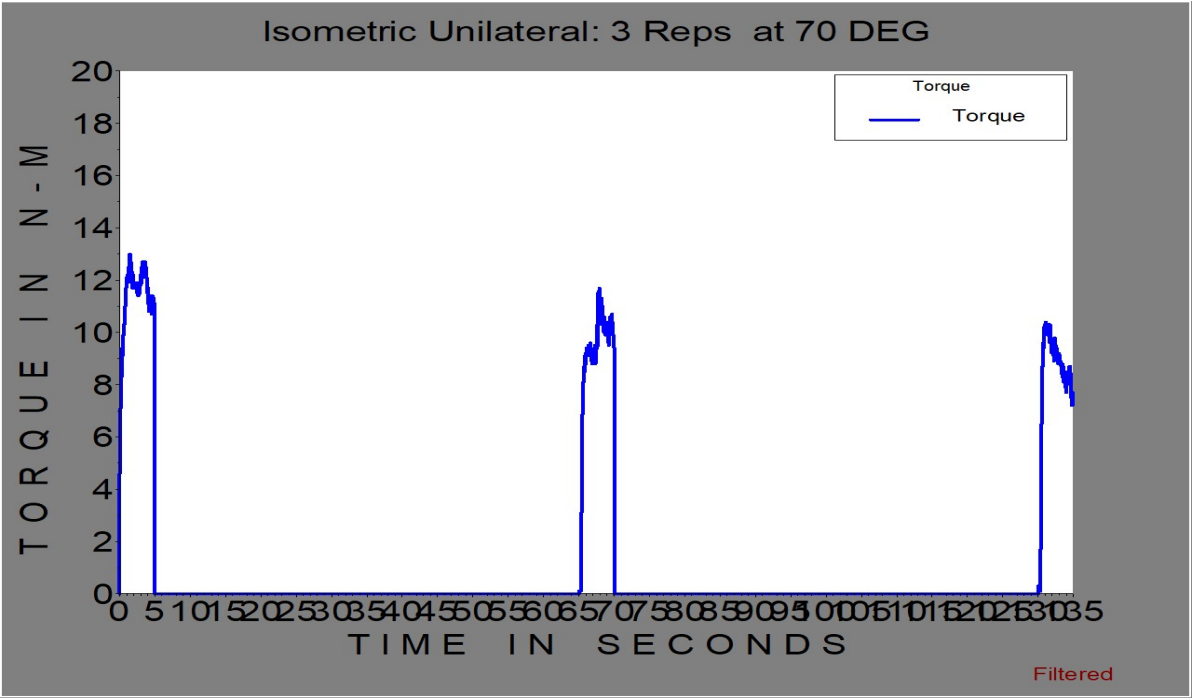

Protocol:Isometric Unilateral

Pattern:Extension/Flexion

Mode:Isometric

Contraction:TOWARD

		AWAY	TOWARD
		70 DEG	70 DEG
Side: RIGHT			
# OF REPS: 3			
PEAK TORQUE	N-M	0.0	12.9
AVG PEAK TQ	N-M	0.0	11.5
AVE PKTQ/BW	%	0.0	13.3
RELAXATION TIME	SEC	60	60
CONTRACTION TIME	SEC	5	5
COEFF. OF VAR.	%	0.0	11.1
IMPULSE	N-M	0.0	2.3
AGON/ANTAG RATIO	%	0.0	

Comments:

PEAK TORQUE:

PEAK TQ/BW :

COEFF. OF VAR.:

AGON/ANTAG RATIO:

Highest muscular force output at any moment during a repetition. Indicative of a muscle's strength capabilities.

Represented as a percentage normalized to bodyweight and compared to an established goal

Statistical representation of test validity based on reproducibility of performance. Lower values demonstrate higher reproducibility.

The Reciprocal muscle group ratio. Excessive imbalances may predispose a joint to injury

Use positive angles for Extension

Use negative angles for Flexion
