Comments:

PEAK TORQUE: Highest muscular force output at any moment during a repetition. Indicative of a muscle's strength capabilities.

PEAK TQ/BW : Represented as a percentage normalized to bodyweight and compared to an established goal

COEFF. OF VAR.: Statistical representation of test validity based on reproducibility of performance. Lower values demonstrate higher reproducibility.

AGON/ANTAG RATIO: The Reciprocal muscle group ratio. Excessive imbalances may predispose a joint to injury

Use positive angles for Extension

Use negative angles for Flexion
